HAPPY BLACK HISTORY MONTH FROM NALA(STEM)

In 1926 Carter G. Woodson, considered the Father of Black History, began to formulate a period of time for a celebration of black history and black culture. Woodson's goal was to make black history a serious field of study in university. Originally, the celebration was meant to be a week long and take place in the 2nd week of February. By the 1960s the idea was accepted and had extended to the entire month of February, and by 1976, 50 years after the original celebration, President Gerald R. Ford recognized it for the country's bicentennial.

NALA(STEM)'s mission is to promote diversity in the STEM, and part of that includes revisiting some of the accomplishments of minorities in STEM (i.e. revisiting Black History). [Click here](#) to learn more about Black contributions to STEM.

Carter G. Woodson (1875-1950) was an American historian, a scholar and the founder of the Association for the Study of Negro Life and History. Woodson was instrumental in launching Negro History Week in 1926.

[LEARN MORE HERE](#)

[LEARN MORE HERE](#)

The Department of Chemistry & Physics at The University of Tennessee at Chattanooga invites applications for a non-tenure-track Lecturer position in General Chemistry beginning August 1, 2024. The successful candidate will hold an M.S. in Chemistry or related field by the start date. Teaching experience is advantageous. Teaching responsibilities will include general chemistry lecture and lab, general science, and other areas, depending upon the successful candidate's specialization (Analytical Chemistry preferred). Candidates should also be willing to engage in a variety of instructional modalities, including online instruction, and in assisting the UTC campus in its ability to reach additional goals as specified in UTC's Strategic Plan.

IUPUI

[Learn More Here](#)

The IUPUI School of Science Department of Chemistry & Chemical Biology invites applications for two full-time non-tenure track faculty positions as Lecturer beginning in August 2024. Our department offers a wide variety of courses for chemistry and other STEM majors, and pre-health professional and general education students. Applicants should hold a Ph.D. in Chemistry or a related field or an M.S. in Chemistry and share our values in inclusive and innovative teaching including active learning strategies. This is an open area search and candidates interested in teaching general chemistry, biochemistry, physical, or inorganic chemistry courses are especially encouraged to apply. Experience in online or active learning pedagogy, such as PLTL, would be beneficial. Non-tenure track teaching faculty have service and scholarly work expectations in addition to their primary teaching load and are eligible for promotion through Senior Lecturer to Teaching Professor.
